

What was the most surprising thing to you ?

The most surprising thing to me is that they knew some past technology that I never heard of or knew about. I now know some technology from the past.

Which question provided the most consistent response ?

The question that provided the most consistent response is the advantages and disadvantages of technology in the workforce. The advantage of technology is that the work will be done faster. The disadvantages of technology is people can lose their job and there would be less interaction with one another.

Why do you think that was ?

I think that this question had the most consistent response because there are advantages and disadvantages of technology in the workforce and everyone has the same opinion.

What did you learn about the topic?

On this topic I learned that technology can help replace jobs and helps save a lot of money for businesses. Also if Technologies replace jobs then there will be less training.

Now that you have this feedback, what do you think would be a good way to further educate the public on this topic?

I think a good way to educate the public with this topic is to have seminars, workshops and meetings because technology is used in our daily lives. It is also important to know technology in order to get a job. Another thing people can do is to take courses and learn more about technology.
